

Chord 组件调用说明

引入

```
<link rel="stylesheet" href="../../src/components/chord/chord.css">
<div id="chord-demo"></div>
```

```
import {renderChord} from "../../src/components/chord/Chord.js";
```

React 工程：

```
import {ReactChord} from "../../src/components/chord/Chord.react.js";
```

调用

```
const instance = renderChord("#chord-demo", model.chord, {
  onSelect: item => {},
  onSliceHover: slice => {},
  onRelationHover: relation => {},
});
```

输入

```
{
  slices: [{id, name, shortName, chordName, color, size}],
  matrix: [
    [0, 3, 2],
    [1, 0, 4]
  ]
}
```

`matrix[i][j]` 表示第 *i* 个 slice 指向第 *j* 个 slice 的聚合关系数。

API

- `highlightSlice(sliceId)`
- `highlightRelation(sourceSliceId, targetSliceId)`
- `clearHighlight()`
- `update(data, options)`
- `destroy()`
